Provides gentle and long-lasting cooling for comfortable relief.
A reusable, eco-friendly way to beat the heat.

6

How the Animals Stay Cool

Animals are cooling off with pools, misters, and cooling fans, as well as frozen treats.
Some animals can roam freely between cooler indoor rooms and the outdoor exhibit area, and others may be housed in their sleeping dens earlier than the scheduled.
If the animals are in off-viewing area, please understand that they are sheltering from the heat.
